

Get the Benefits of Graphite with Miracle Lubricants

Proudly serving customers worldwide for two generations, Miracle Power Products Corporation has developed a strong reputation for providing the highest quality graphite lubricants available.

Miracle dgf-123:

Contains no CFC's
Repels dust and dirt
Assures positive initial lubrication
Covers discolorations on metals - gives an attractive black finish
Prevents rust and corrosion
Excellent mold release agent
Heat tolerant to 3000 degrees F
Ideal lubricant for around the shop maintenance - garage doors, tools, electrical switches, chains and cables, etc.

Your Satisfaction is Guaranteed

Welcome to Miracle Power Products Corporation. Based in Cleveland, Ohio since 1952, we have a long history of providing only the best graphite lubricants for pre-assembly, assembly, maintenance and storage. Our dgf-123 is preferred by LEADING RACE TEAMS for providing "clean" lubrication in near ZERO TOLERANCE applications. Excellent EXTRUSION OR INJECTION MOLD RELEASE AGENT. AVIATION companies rely on dgf-123 to provide "clean" lubrication and PREVENT RUST AND CORROSION. Depended on by a major metropolitan TRANSPORTATION department, dgf-123 is a MAINTENANCE/REPAIR staple for subway cars, buses and other vehicles.

What makes us different? For generations we've pursued perfection by using only the highest quality ingredients to manufacture our graphite lubricants.

- Colloidal Synthetic Graphite particles 1 micron or smaller
- Excellent conductor for electrical applications
- Ideal for use in near zero tolerance applications
- Reduces friction on bearing surfaces
- Even film consistency, greatest spray control - spray as thick or thin as needed
- Non-settling formula - does not require vigorous shaking or mixing before use
- Contains No CFC's
- Heat Tolerant to 3000 degrees F
- Air dries at room temperature in 2 - 3 minutes
- Maintains thicker oil films on bearing surfaces
- Repels dust and dirt - ideal for tool & die production, parts storage
- Anti-corrosion, prevents and protects against rust
- Protects precision parts during storage and shipping
- Provides a protective and attractive black finish

Our Products

dgf-123

Pre-assembly dry graphite film protects against scuffing, scoring, seizing, over-heating. Assures positive initial lubrication, won't burn or drain off. Provides protective coating for precision parts during storage and shipping. Provides dry, clean lubrication and protection against rust and corrosion.

wgf

Wet graphite film final assembly lubricant protects during break-in, eases metal to metal contact. Assures smooth fitting parts and easy assembly, provides lubrication on vital parts until circulating oil reaches those areas. Contains zinc dialkyldithiophosphate, a recommended break-in compound for newly installed cams and lifters.

Miracle Power Concentrated Oil Supplement

Cuts friction and drag, increases mpg, faster starting in extreme temperatures. Provides lubrication, even when oil is not circulating.
